Channel Grilles

TEZKOM COMPOSITE

Operating since 2013 in its facilities located in the Eskişehir Organized Industrial Zone—spanning a total area of 25,000 m² with 13,000 m² of indoor space—the company serves its customers as one of the leading organizations in the composite industry.

The company manufactures composite-based products, which are among the most critical materials of the future, using Pultrusion, Open Molding, SMC and BMC techniques, Hand Lay-up, and Pressing technologies. It offers tailored solutions to meet the requirements of the construction, chemical, defense, food, agriculture, maritime, aviation, and automotive sectors.

Its fully equipped 1,500 m² laboratory, which completed its accreditation process in 2017, stands among Turkey's largest R&D investments. Holding TÜRKAK accreditation, the laboratory leads the industry's development by providing comprehensive testing services from raw materials to final products.
